Process and service to purchase data from OCAS:

1. Contact OCAS at statistics@ocas.ca,
2. Subject line: OCAS Data/Report Package Request
   Use the text from one of the options above in the email body, specify the academic cycles you're interested in and in addition to your contact information, please include the Superintendent or board delegate's contact information.
3. Each board must sign a Master Use Agreement (MSA) and statement of work (SOW). It's to be signed by a board representative. The reports include all the schools in the school board, so approval by your Superintendent or board delegate is required. The Board delegate signs the MSA and SOW, receives the report packages and the login to retrieve the report package once it's completed. If the Board has previously signed an MSA, only a new SOW is required. They must then coordinate with the adult and continuing education school principal or project contact.
4. OCAS sends the invoice to the Board contact identified on the MSA and receives payment from the board.
5. OCAS also includes a 1 hour webinar on how to use the reports.

Known Data Gaps:

a. Graduation information is available for 21 of the 24 Ontario Colleges. That being said, the enrolment information does show and demonstrate the persistence of students in their college programs. For three colleges, we can't tell if the students crossed the graduation finish line, but could infer they did if they persisted in their program.
b. With the introduction of the Canadian Anti-Spam Legislation (CASL) in July 2014, email addresses of the students at the time of application will no longer be included in the packages; other student contact information is included.
c. To help establish the desired academic cycles
   I. In December, OCAS will be processing the fall college enrolment information, this academic cycle is in progress, but fall enrolment would be available in January.
   II. Graduation information has been collected since 2010.
